Community Watch Builds a Strong and Safe Community

Living on a military base can be a wonderful experience for you and your family. We get to live amongst friends and colleagues who understand the unique experiences of the military and this life. However, it is still important not to let that create a false sense of security. Long gone are the days where only military members and their families have access to the base – now the military is comprised of lots of civilian workers, contractors, and others. This reality should not alarm anyone; however it should remind us all to take extra care when it comes to our homes and families. Remember to lock your doors when home alone or when turning in for the evening. Keep your windows and vehicles locked when not in use. And above all else, report any suspicious activity or persons to security forces immediately. Base housing, like any other community, is strengthened by its members. Let's look out for one another and each do our part to ensure our community stays a great place to call home.

Together we can make certain our neighborhoods are happy, healthy, and safe – but it takes help from every member of our community.

Hunt Update

Summertime – and moving's never easy...

June brings warm weather, the end of the school year and MOVING VANS! Let's show our new neighbors our great sense of community and welcome new families. There's nothing like a smile and freshly baked cookies, or a pitcher of iced tea, a pot of coffee or a chilled adult beverage to make a new family feel at home.

Ensure new neighbors are included in block parties or potluck meals. Introduce kids to others their age. It's much nicer to have someone to hang out with during the summer.

Our community is uniquely situated to welcome newcomers. It's a great way to model empathy to our children and perhaps make some new friends.

Maintenance

Water Awareness and Summer Safety

No matter where you live, summer and water seem to go together. Here are a few items to keep in mind this season:

With mosquitoes on everyone's mind, eliminate standing water areas, such as bird baths, kid's toys, pails, wading pools, plant saucers or other places where water may accumulate. A child can drown in just a few inches of water in a bucket – adult supervision is essential when kids are around water.

It's also prime time for open windows. Keep in mind that window screens keep bugs outside – they don't keep kids inside. Ensure children are supervised when windows are open and keep furniture which could be climbed away from windows. It's tempting to use the dresser drawers as steps, for example, so be mindful that kids may use furniture in unexpected ways. Check that any blind cords hang freely – they shouldn't be knotted or tied to prevent strangulation. If you have concerns, please contact maintenance.
