

## REFER A FRIEND IN FEBRUARY AND GET \$750!

### Winter Temps are Still in Effect!

1. Remove all hoses from hose bibs to prevent freezing.
2. Open cabinets so that the warm air can reach pipes along exterior walls that are often exposed to the most extreme temperatures. Be sure to move any harmful cleaners and household chemicals up out of the reach of children.
3. Turn on faucets from both the hot and cold side so that they drip. Dripping faucets can help prevent freeze ups.
4. If you are going to be away for the next few days please make sure you leave your heat on in your home.
5. Keep garage doors closed.

Please contact us immediately if you are experiencing any problems with your pipes freezing.
