MAINTENANCE CORNER

5 Tips to Prevent Frozen Pipes

1. Disconnect garden hoses.
2. Don't turn off your heat. It is best to keep your thermostat no lower than 65 degrees and keep it running to prevent frozen or busted pipes.
3. Let all faucets drip. With constant water flow, this helps avoid frozen pipes.
4. Open cabinet doors where plumbing is located. Opening kitchen and bathroom cabinets under sinks allow warm air to circulate.
5. Keep garage doors closed. Garage doors should be completely closed when not in use during winter months.
