Maintenance Tips

Friendly Reminder that furnace filters should be changed out monthly. These filters can be picked up at the maintenance shop during normal business hours!

We are quickly approaching winter months and it is good to be proactive in winterizing your home. Here are a few tips to help prepare for these upcoming cold temperatures:

- **Disconnect garden hoses**
- **Don't turn off your heat**
 - It is best to keep your thermostat no lower than 65 degrees and keep it running to prevent frozen or busted pipes
- **Let all faucets drip**
 - With constant water flow, this helps avoid frozen pipes
- **Open cabinet doors where plumbing is located**
 - Opening kitchen and bathroom cabinets under sinks allows warm air to circulate
- **Keep garage doors closed**
 - Garage doors should be completely closed when not in use during winter months
