OCTOBER MAINTENANCE TIP

Prevent Plumbing Problems this Fall

As temperatures cool and leaves begin to fall, it's a great time to take a few simple steps to protect your home's plumbing system. One of the most common causes of drain clogs is pouring grease, oils, and food scraps down kitchen sinks. Even when rinsed with hot water, grease can solidify inside pipes over time, causing blockages, backups, and costly repairs.

Instead, allow cooking grease to cool, place it in a disposable container, and throw it away with your household trash.

If you notice slow-draining sinks, unpleasant odors, leaks, or other plumbing concerns, please submit a maintenance request promptly. Addressing small issues early can help prevent larger problems and keep your home's plumbing running smoothly.

A little prevention today can help avoid plumbing headaches tomorrow!
